# Connecting to eduroam on a Mac laptop

You will first need to configure your laptop in order to connect to eduroam. To do this you will need to download and install a configuration tool. This can be done by connecting to the StrathWifiSetup network available in the Library and Student Residences. The following instructions show the steps for doing so on a Mac laptop. Different versions of Mac may vary slightly in layout but the process will remain the same. You will only need to configure your device once and thereafter it will automatically connect to eduroam.
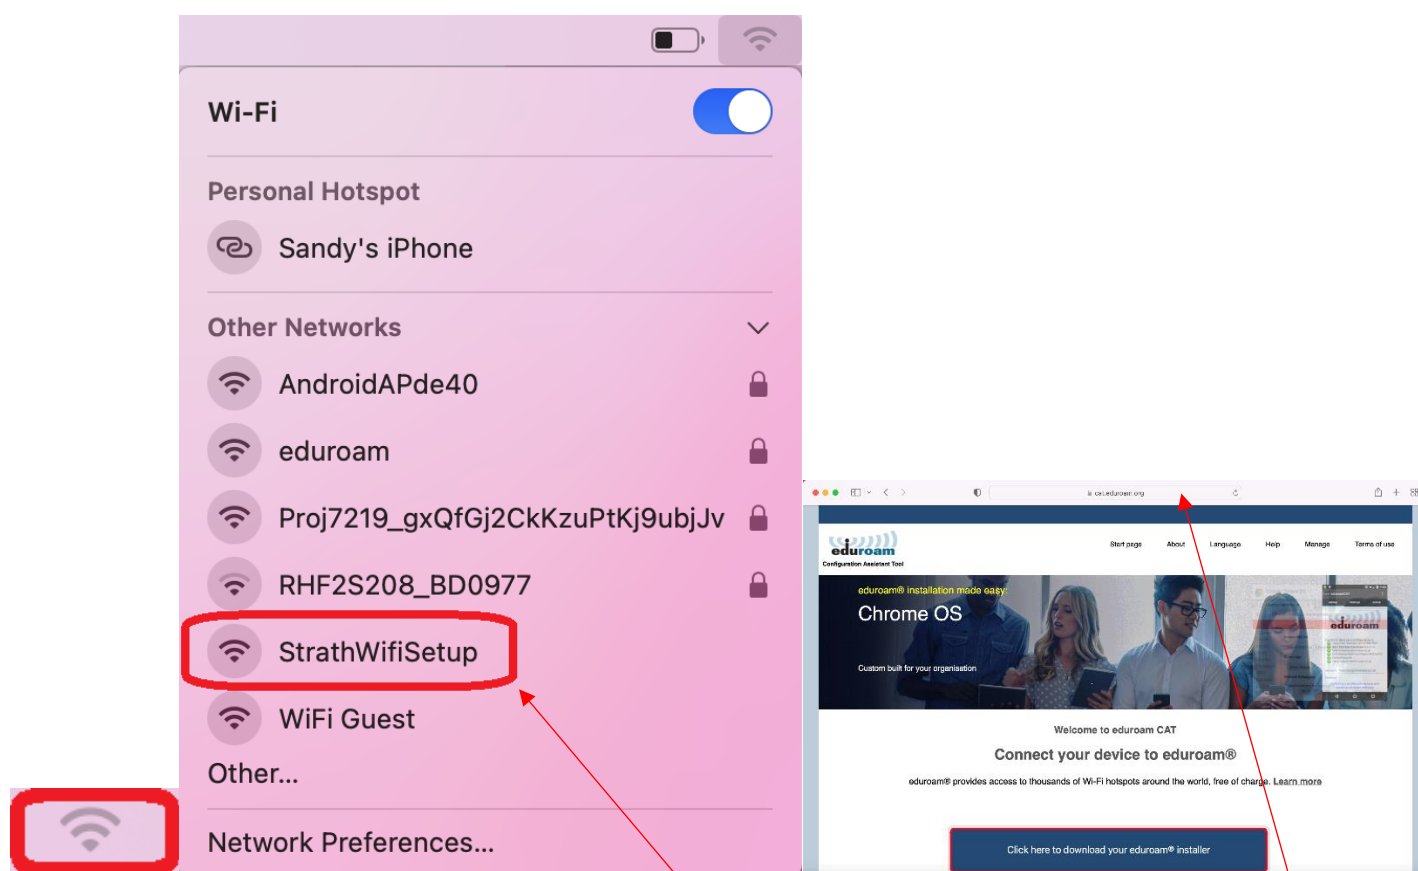

1. Click on the wifi icon.

2. In the drop-down menu, click on StrathWifiSetup.

3. Open a browser and enter cat.eduroam.org into the address bar. Click on Click here to download your eduroam installer.
